How does an individual obtain Community Care Services?

Step 1: The individual contacts the Area Agency on Aging for an assessment.

Step 2: If the individual is eligible for CCSP, the care coordinator determines which services the applicant needs.

How are services arranged?

Step 1: The care coordinator arranges for CCSP service agencies to provide the needed services. Service agencies are approved Medicaid providers

who bill the Department of Community Health directly for services rendered to Community Care clients. Care coordinators also arrange for client services through other service agencies and fund sources.

Step 2: If the individual is not a Medicaid recipient, she/he applies for Medicaid at the local county office of the Division of Family and Children Services.

Step 3: The care coordinator maintains regular contact with Community Care clients to assure that services are appropriate and that individuals' needs are met. Client /family representative participates in the development of the client care plan.

What are the financial eligibility requirements?

- SSI category: Persons who receive Supplemental Security Income (SSI) and are eligible for medical assistance. The Social Security Administration takes applications for SSI.
- Medical Assistance Only (MAO) category: Persons who do not receive cash benefits under the SSI program, but may qualify for medical assistance under another Medicaid category. The county Departments of Family and Children Services take applications for MAO. MAO participants may have to pay toward the cost of services.
